Certified RVM Suppliers and Machine Families

Browse the certified Reverse Vending Machine (RVM) suppliers and models available for use within the Deposit Return Scheme.

Click on a supplier's website link to explore their machines, view specifications and contact them directly for further information.

Look for the Exchange For Change certification stamp

When choosing a Reverse Vending Machine (RVM) supplier, look out for our official certification stamp. RVM certification is an independent assessment carried out by PPS to verify that machines meet the specifications set out by Exchange For Change, ensuring they meet the required standards to support the Deposit Return Scheme (DRS). Our certification stamp helps you easily identify RVM models that have successfully completed the certification process*.

*Certification only confirms that the relevant RVM meets our requirements; it does not guarantee its performance. Retailers remain responsible for agreeing appropriate performance terms with their RVM supplier.

Certified RVM Suppliers

The Exchange For Change RVM Certification Logo provides a clear and recognisable way to identify Reverse Vending Machines (RVMs) that have successfully completed the independent certification process and meet the RVM specifications set out by Exchange For Change.

Certified RVM suppliers can request the official certification logo to display on their websites and relevant marketing materials, helping retailers identify certified machines with confidence.

How to request the logo

If you are a certified RVM supplier and would like to use the Exchange For Change RVM Certification Logo, please contact our Marketing Team at **marketing@exchangeforchange.co.uk**.

Our team will provide the approved logo and guidance on its appropriate use.
